Developing a Logic Model for Healthy People 2030

Shiriki Kumanyika, PhD, MPH
HP 2020 SAC Vice-Chair
Member HP 2030 Priorities Subcommittee
Action Model to Achieve HP2020 Overarching Goals: Objectives

- Bring together HP 2020 components
- Show need to address a broad array of nested health determinants
- Life course perspective
- Show the relationships among interventions, determinants of health, and outcomes
- Action orientation to address user concerns that prior versions of Healthy People did not articulate, motivate, or inform specific actions to achieve objectives or meet targets.
Approach

• Adapted from commonly used ecological model as it appeared in an Institute of Medicine Report of 2002.

Action Model to Achieve Healthy People 2020 Goals

Determinants of Health

Interventions
- Policies
- Programs
- Information

Outcomes
- Behavioral outcomes
- Specific risk factors, diseases, and conditions
- Injuries
- Well-being and health-related QOL
- Health equity

Assessment, Monitoring, Evaluation & Dissemination
Healthy People 2020
A society in which all people live long, healthy lives

Overarching Goals:
- Attain high quality, longer lives free of preventable disease, disability, injury, and premature death.
- Achieve health equity, eliminate disparities, and improve the health of all groups.
- Create social and physical environments that promote good health for all.
- Promote quality of life, healthy development and healthy behaviors across all life stages.

Determinants of Health
A framework for reaching Healthy People 2020 goals

ODPHP
Considerations for HP 2030 Model

• Similarities or differences in thrust or innovation for 2030 vs. 2020
• What, if anything should be carried forward from the 2020 model?
• What is most important to convey for a HP2030 graphic?
• Is there an existing resource to be adapted, as for 2020?
